

The Defender

Today. The global war on terror rages on. The United States will not give an inch against terrorists and especially against Mohamed Jamar, considered the worst of them all. Jamar has been missing for months, but his network continues its work. The President stands firm before the world, but behind the scenes his team are working to find the final solution. Jamar represents a paradox: he can never be killed, because if found dead he would become an instant martyr. If caught he must be tried. If found guilty he would again become a martyr and further inspiration to acts of terror. If acquitted the policies of the entire western world would be destroyed. So he must remain invisible.

Roberta Jones, the head of the National Security Agency, is working to ensure he remains invisible forever. Under the guise of attending an Eastern European conference on Terror in Romania, she attends a secret meeting with Jamar at a secluded hotel outside Bucharest. No one knows about this meeting and her goal is to buy his invisibility. Her only companions are her security team of six, headed by Lance Rockford, her personal bodyguard. These are the best of the best, former military special forces personnel capable of anything. When they arrive at the hotel for the secret meeting they are ambushed – no one is supposed to know about the meeting but someone wants it stopped. They have to fight for their lives against an unknown attacker.

Lance, a man of highest integrity with an impressive record of service for his country, is forced into a situation which challenges his very beliefs – he must not only defend Mrs Jones and fight against an unknown and ruthless foe, but he must find and protect Jamar, the man who embodies everything he dedicated his life to fight against. *The Defender* is a story of honour, integrity and loyalty set in an action-packed, hard-hitting combat film.
